Executive Brief: Fixyachips Global Solutions LLC

Project: The "No-Drill" Automotive VOD Academy

Principal: [Your Name]

Infrastructure: AWS Serverless Architecture (Proprietary)

I. THE DISRUPTION

Fixyachips Global Solutions LLC is transitioning 40 years of industry-leading expertise into a **fully automated EdTech platform**. Our proprietary "No-Drill" methodology eliminates structural trauma to glass, providing a superior, physics-based repair standard for the 800,000+ automotive technicians in the U.S. market.

II. TECHNICAL ARCHITECTURE (Zero-Support Scalability)

Unlike traditional training centers, our platform requires **zero physical overhead**.

- **Hosting:** AWS S3 & CloudFront (Global, high-security content delivery).
- **Security:** AWS Cognito (Encrypted user identity and access control).
- **Automation:** AWS Lambda (Automated certification and CE Credit processing).
- **Gateway:** M&T Merchant Services / Authorize.net (Direct-to-bank settlement).

III. FINANCIAL PROJECTIONS (High Operating Leverage)

Core Product: Professional Certification | **Unit Price:** $500.00

Operating Margin: 95%+ (Post-production)

Adoption Phase	Market %	Total Students	Gross Revenue	Tech Overhead (Est.)
Initial Beta	0.05%	400	**$200,000**	<$50/mo
Year 1 Goal	0.5%	4,000	**$2,000,000**	<$200/mo
Year 2 Scale	2.5%	20,000	**$10,000,000**	<$800/mo
Market Standard	10.0%	80,000	**$40,000,000**	<$3,000/mo

IV. STRATEGIC POSITIONING

1. **Mandatory Compliance:** By securing **Continuing Education (CE)** status, our course moves from "optional" to "industry required."
2. **Asset-Light:** No rent, no staff, and no inventory. Every $500 enrollment flows directly into the M&T business account.
3. **SBA Readiness:** This architecture demonstrates a "Fortress Balance Sheet" with minimal liabilities and infinite scalability.
